financial report

To BP shareholders

When we mailed our letter of June 30th which was accompanied by notice of the Special General Meeting of Shareholders to be held on July 28th, the audited Consolidated Balance Sheet as at May 31st, 1964 and the Consolidated Statement of Income for the first five months were not yet available. These have since been received and as they are of interest in connection with the matters which will be acted upon at the Special General Meeting, we are enclosing copies. Unfortunately, audited figures prepared on a similar basis for the same period of 1963 are not available for purposes of comparison.

In announcing that we had a 61% increase in sales for the first quarter of this year versus the same period of 1963, we pointed out that the increase was largely the result of Government incentives for winter construction and buying in anticipation of the increase in sales tax on building materials which went into effect on April 1st. This conclusion has now been confirmed by the second quarter's operations, at the end of which this improvement had been reduced to 16%. Sales are still being somewhat retarded by inventories of unsold houses as well as the limited amount of NHA mortgage money available to builders. However, we expect that the year as a whole will show a favourable comparison with 1963.

The Directors wish to express their appreciation to the large number of shareholders who have sent in their proxies to management. As there are important matters to be decided at the Special General Meeting, it is desirable that as many shareholders as possible be represented in person or by proxy. For those who may have overlooked action or who have misplaced the Instrument of Proxy we are enclosing an extra copy with this letter. The proxy can, of course, be withdrawn if you decide to appear in person and vote your shares at the meeting.

On behalf of the Board of Directors,

L. F. Long
Chairman of the Board

notes to consolidated financial statements *May 31 1964*

1. The company has entered into an agreement for the sale as of June 1 1964 of its entire undertaking and assets for a cash consideration of \$19,000,000 and the assumption of its liabilities (other than for taxes on income and certain other items), subject to adjustment as provided in the agreement. The proposed sale is subject to the approval of the agreement by the shareholders.
2. Sales rebates and salesmen's commissions are paid at varying rates on the volumes of purchases made by customers and sales achieved by salesmen in a calendar year. The provision of \$240,186, less reduction in provision for income taxes of \$120,000, represents the expense which is considered to be applicable to the sales recorded in the five months ended May 31 1964 after deducting payments on account.
3. Maximum capital cost allowances, which differ from depreciation recorded in the accounts, are claimed for income tax purposes. Reductions in current income taxes obtained in those years in which capital cost allowances exceed depreciation recorded in the accounts are set aside as deferred income taxes. In those years in which capital cost allowances are less than the depreciation recorded in the accounts, income taxes applicable to the difference are transferred out of deferred income taxes.
4. Options to purchase 12,950 unissued shares of the company have been granted to officers and employees out of a total of 23,200 shares available for options under the provisions of a plan adopted in 1962 which fixed the option price at 90% of the market price ruling on the business day next preceding that on which the options were granted. None of these options had been exercised at May 31 1964; in June 1964, options for 3,400 shares were exercised at \$28.24 per share and for 1,400 shares at \$24.30 per share.
5. The amount necessary to complete projects authorized at May 31 1964 is estimated to be \$860,000, of which \$235,000 represents firm commitments.
